

SERENGETI EYEWEAR

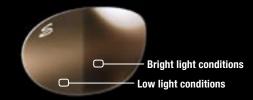

SERENGETI'S HIGH DEFINITION LENS

Serengeti's proprietary Spectral Control® lens system provides contrast and color enhancement by selectively filtering certain colors from the visible light spectrum. This allows the most optimal colors through, creating an effect where colors are crisper and images are clearer, making it the ultimate high definition view.

CHANGE IS INEVITABLE

Serengeti's exclusive photochromic lenses automatically darken in bright sunlight to give superior definition, while they lighten in overcast or shade conditions for extra contrast. And since the technology is infused directly into the lens, it will never wear off or out.

BLOCK THE BLUES

Blue light waves cause a phenomenon called "blue blur," which occurs when they scatter off dust and moisture particles in the air and, essentially, veil glare. Serengeti lenses block 95% of blue light, virtually eliminating the eye strain and fatigue blue blur can cause.

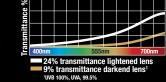

UV PROTECTION GOES BEYOND STANDARDS

The government and commercial bodies have set standards for UV protection in sunglasses. Then there are Serengeti's standards. They're like yours. They go beyond the basic level of expectation, eliminating virtually 100% of UVA and UVB rays. Our lenses also feature an anti-reflexive coating on the back side to block additional glare and reflections.

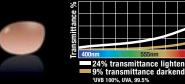

ELIMINATE THE HARSH GLARE

Glare is an inevitable by-product of light rays bouncing off reflective surfaces like the road and water. But Serengeti's polarizing film removes glare as an uncomfortable factor in driving, and the eye fatigue it can cause. Available with most Serengeti lenses.

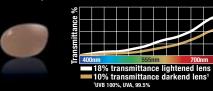

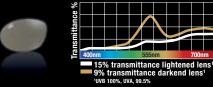

DRIVERS® The Drivers brown lens is the optimal color and quality for driving, with the versatility to adjust to changing light conditions.

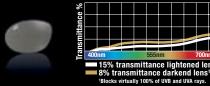

DRIVERS® GRADIENT Another exceptional, all-condition lens, Drivers Gradient is the choice of pilots who need protection for their eyes, but a clear view of their instrument panel.

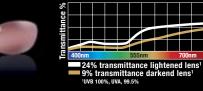

DRIVERS® POLARIZED Good in cloudy conditions, as well as bright light, with the added benefit of Serengeti's polarizing technology.

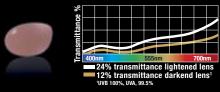

555nm® The lens engineered to maximize green and yellow in low light conditions to provide greater contrast and image definition. The silver flash coating blocks glare from every direction.

555nm® POLARIZED Technologically advanced, combining our patented Spectral Control® filters and our hydrogen fired photochromic properties, with the most optically correct and technically efficient polarizing film

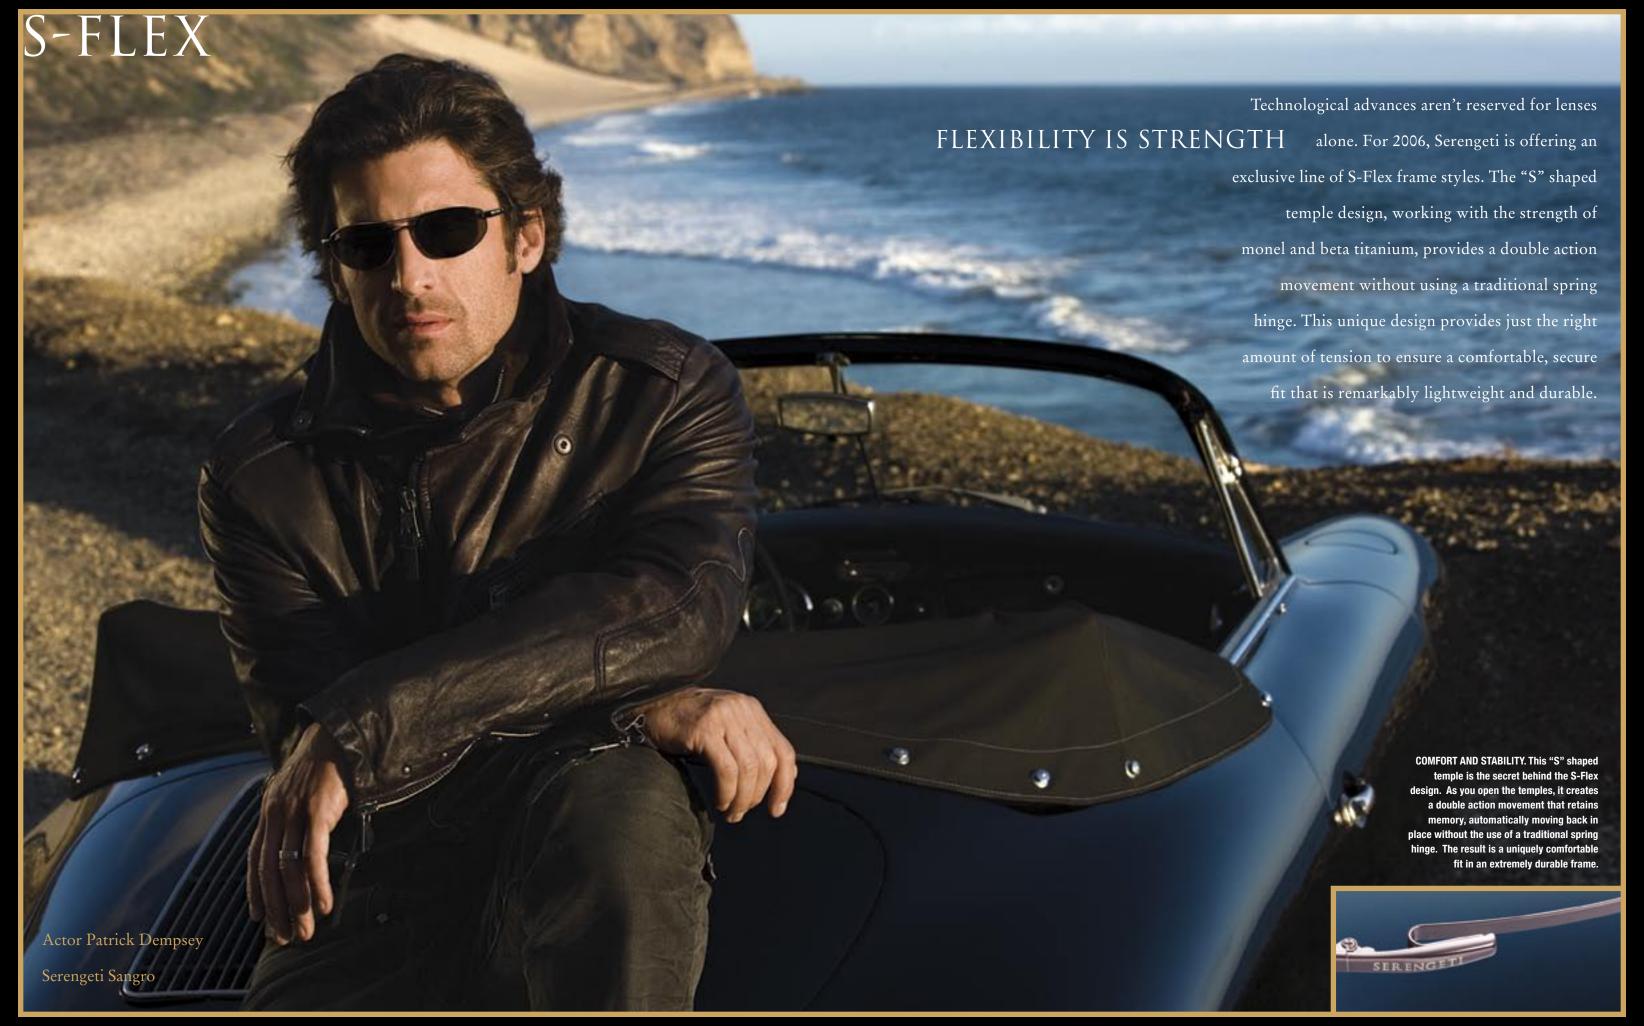

SEDONA® The high-contrast, rose-colored Sedona is the preferred lens among skiers, golfers and water sports enthusiasts, providing greater contrast and clarity in the harshest light conditions.

SEDONA® POLARIZED Functions just as exceptional in harsh light conditions, with the added benefit of Serengeti's polarizing technology.

POLARMAX™ CPG (Cool Photo Gray) Light on weight, but not on performance, this lens combines ultra-lightweight polycarbonate lenses with exceptional polarization and photochromic properties.

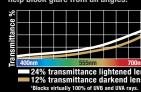

POLARMAX™ DRIVERS The polycarbonate material makes it one-third the weight of a glass lens, but it still packs 100% pure Serengeti technology.

POLARMAXTM ROSE Serengeti adds to its legacy with this popular new color. Rose lenses are polarized, photochromic, and include an anti-reflective coating to help block glare from all angles.

NEW POLARMAX™ ROSE

For 2006, Serengeti has expanded its

PolarMax line to include a highly
sought-after Rose polarized lens.

Like the Drivers and CPG lens, they also

feature photochromic lenses that
adjust to the changing light conditions
and include an anti-reflective coating
to help block glare from all angles.

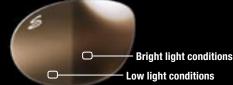

LAYERS OF PROTECTION

The PolarMax lens features polarized properties with a patented photochromic technology which is imbedded inside the lens to prevent scratching or distortion.

POLYCARBONATE LENS

Virtually shatterproof, ultra-lightweight and 20 times more impact resistant than glass.

PHOTOCHROMIC TECHNOLOGY

Serengeti's exclusive, photochromic lenses automatically darken in bright sunlight for superior definition and lighten in overcast conditions for needed contrast. With Serengeti, you're always wearing the right lens, no matter what the conditions.

ELIMINATE THE HARSH GLARE

Glare is an inevitable by-product of sunlight—light rays bounce off a reflective surface and produce glare. Could be the road, could be an oncoming car. But Serengeti's polarizing film removes glare as an uncomfortable factor in driving, and the eye fatigue it can cause. Available with every PolarMax product.

UV PROTECTION GOES BEYOND STANDARDS

The government and commercial bodies have set standards for UV protection in sunglasses. Then there are Serengeti's standards. They're like yours. They go beyond the basic level of expectation, eliminating virtually 100% of UVA and UVB rays. Our lenses also feature an anti-reflexive coating on the back side to block additional glare and reflections.

WARRANTY

INTRODUCTION Congratulations on your purchase of Serengeti® eyewear. No matter the weather, Serengeti's patented Spectral Control® system is a dynamic "smart" lens technology that provides the ultimate in comfort and clarity. This exclusive photochromic lens is constantly adjusting for superior definition and enhanced contrast. Welcome to The Unseen Science of Serengeti™. To register your product on-line go to: www.serengeti-eyewear.com.

LIMITED WARRANTY Serengeti warrants to the consumer that for one year from the date of purchase we will repair or replace, at our option, any Serengeti product that is defective in materials or workmanship. This warranty does not apply to products which have been lost, altered, broken or damaged by misuse or failure to follow instructions provided with the product. Serengeti does not warrant against normal wear, including lens scratching or accidental frame breakage.

For this warranty to apply, purchase must have been made in the United States from an authorized Serengeti dealer and you must have the proof of purchase. Only authentic Serengeti products will be warranted. This warranty shall not apply to any defect or damage caused by improper or unreasonable use of this product. Serengeti lenses are not warranted against scratching. All warranties that are implied by law are also limited for one year from the date of purchase.

For product registration: www.serengeti-eyewear.com

Consumers may send damaged or defective products with proof of purchase from an authorized Serengeti dealer to:

Bushnell Performance Optics 8500 Marshall Drive Lenexa, KS 66214

If your Serengeti product is no longer under the limited warranty and has been damaged by accidental and/or normal use, Serengeti will inspect and repair (if possible) the product in question at our place of business. Please contact the Repair department at 888-838-1449 for more information. For products purchased outside of the United States, please contact your local dealer for applicable warranty information.

CARE AND USE Please take care of your Serengeti sunglasses. On those rare occasions when you aren't wearing them, store them in their case. Warning: Serengeti lenses are scratch resistant, not scratch proof. By taking a few precautions to preserve the lenses, they will last for many years. Serengeti does not warrant against normal wear, including lens scratching or accidental frame breakage.

To clean lenses, blow loose particles off the lenses, then clean with an optical lens cloth or soft cotton cloth. A mild liquid soap diluted with warm water can also be used on the cloth. *Never use paper products to clean lenses. *Since salt is highly abrasive, rinse lenses

with fresh water before cleaning. *Store glasses in their protective case when not in use. *Do not place lenses face down on any surface. *Never put your sunglasses loose in a pocket or purse where objects may damage lenses. *Do not leave your sunglasses where conditions are intensely hot or cold (for example, on the dashboard of your car).

Caution: Do not wear for night driving, for impact sports or use as safety glasses. Serengeti sunglasses comply with ANSI Z80.3 special-purpose UV requirements. Lenses meet Conn SGST40 and FDA impact requirements, but are NOT SHATTERPROOF. All Serengeti products (with lenses of nominal plano power) are in compliance with Council Directive 89/686/ EEC (PPE) and are CE marked accordingly.

PRESCRIPTION Serengeti makes prescriptions available in all of its popular glass lenses: 555nm[®], Drivers[®], Drivers[®] Gradient, Sedona[®] and Strata[®] (polarized).

The Serengeti Authentic Rx Program provides:

- Perfectly matched lens colors and technologies, authenticated by our signature "S" logo on the wearer's right lens.
- 6- and 8-base lens technology that allows for a wider range [+2.00 to -4.00] of prescriptions in Serengeti's popular frames.
- Extensive partnership with the industry expert in Rx lens development, SOLA Optical.
- Available in Single Vision and Progressive
- Our pledge for the highest in product quality and service.

Eyecare professionals may contact customer service at 888-838-1449 for ordering and additional program information.

CE INFO All Serengeti products (with lenses of nominal plano power) are in compliance with Council Directive 89/686/EEC (PPE) and are CE marked accordingly.
